SCHMETZ
NEEDLES SINCE 1851

We want to make things as simple as possible for you.

These instructions will provide you with useful tips on using the General Information.

G.I Legend, comparison of equivalent needle sizes and point forms

Here you will find basic information on needle sizes, different point types and other important features of a needle:

G.II System-overview

In the system-overview assortment is strictly numerical. Please refer to our example:

System Sistema Système System	PG GP GP PG	Canu	Segment Segmento Segment Segment
62X45 SERV 7	060	44:31 17	P.C
62X45 SES	060	44:31EB1	P.A
62X57	080	33:30 1	P.A
62X57 BLUK.	080	33:30 3	P.C
62X57 SERV 3	080	33:30 13	P.A
62X57 SERV 7	080	33:30 17	P.C
62X57 SES	080	33:30EB1	P.A
62X57 SUK	080	33:30FB1	P.A

System The number in the system determines order.

PG Using the price group **PG** you can refer to the valid price list for prices.

Canu SCHMETZ catalogue number for the respective system or for equivalent systems. A 1:1 picture of the needle and the common needle sizes can be found in the Canu overview G.IV using the Canu No.

Segment Detailed information on using a needle can always be found under the respective segment number in the SCHMETZ catalogue. Example: P.A = Round points / Needles for stitching textiles.

You can't find the system designation you are looking for?

1. Please go to the system-overview G.III. The needle system you are looking for may have a system designation which is no longer used in the SCHMETZ range.
2. Please contact your dealer or SCHMETZ direct.

G.III System designations no longer used in the SCHMETZ range

The system designations no longer used in the SCHMETZ range are listed here in numerical order.

Please refer to the example:

You are looking for the system 797 and find the current SCHMETZ designation 134 (R) in this table.

The equivalent Canu for system 134 (R) can be found in the system-overview G.II.
System designation 134 (R) = Canu 20:05 1

G.IV Canu-overview

The Canu-overview is in ascending numerical order.

Picture The picture of the needle is to a scale of 1:1, the most important installation dimensions and point symbols are also specified. Further information on needle geometry can be found in the legend starting on page G.I.1.

Needle size Needle size is always specified in NM (numerical), SIZE (Asian/old Singer designation) and, in certain cases, system-specific designations are used.

System List of system designations according to the needle picture and Canu.

G.V Price group

Using the price group **PG** you can refer to the valid price list for prices.

SCHMETZ note:

If the letter after the Canu changes, this only indicates a change in the needle's point type. Needle geometry stays the same.

Please refer to our example:

Canu	System
20:05 **EB** 1 =	134 **SES** (light ball point)
20:05 **FB** 1 =	134 **SUK** (medium ball point)

Please refer to the table of needle points in section G.I.

If the design/geometry of the needle changes, so does the Canu.

Example: Canu 20:05 1 134 (R)
19:25 1 134 K - short point
18:60 1 134 KK - short shank

Canu 20:05 1

G.I Leyenda, comparación de grosores identicos y formas de la punta

Aquí encontrará informaciones básicas acerca de los grosores de aguja, diferentes formas de la punta y otras características importantes de una aguja:

G.II Tabla de sistemas

En la vista general de sistemas rige un criterio numérico de orden muy severo.
Compare para ello nuestro ejemplo:

System Sistema Système System	PG GP GP PG	Canu	Segment Segmento Segment Segment
62X45 SERV 7	060	44:31 17	P.C
62X45 SES	060	44:31EB1	P.A

62X57 SES	080	33:30EB1	P.A
62X57 SUK	080	33:30FB1	P.A

Sistema El número en el sistema rige como número de orden.

GP Partiendo del grupo de precios **GP**, puede tomar los precios de la lista de precios válida.

Canu Número de catálogo de SCHMETZ para el sistema en cuestión o para sistemas idénticos. Una ilustración 1:1 de las agujas y los grosores más corrientes de las mismas los encontrará sirviéndose del No de Canu en la vista general G.IV del mismo.

Segmento Detalladas informaciones sobre la aplicación de una aguja lo encontrará siempre bajo el número de segmento que venga al caso en el catálogo de SCHMETZ. Por ejemplo: P.A = Puntas redondas/Agujas para coser tejidos

¿Usted no ha encontrado la denominación del sistema?

1. Sírvase echar mano a la vista general de sistemas G.III. Es posible que el sistema de agujas buscado tenga una denominación de sistema que no se utiliza más en el programa de SCHMETZ.
2. Póngase en contacto con su agente o directamente con SCHMETZ.

G.III Denominaciones de sistemas obsoletas y los sistemas SCHMETZ

Las denominaciones de sistemas que no se utilizan más en el programa de SCHMETZ van listadas aquí numéricamente.

Compare para ello el ejemplo:

Usted busca el sistema 797 y encuentra en esta tabla la denominación actual de SCHMETZ 134 (R).

El correspondiente Canu para el sistema 134 (R) lo encontrará en la vista general de sistemas G.II
Denominación del sistema 134 (R) = Canu 20:05 1

G.IV Tabla de Canu

La vista general del Canu está ordenada numéricamente de forma ascendente.

Ilustración La aguja está ilustrada en la escala 1:1. Las medidas de montaje más importantes e las simbolos de puntas van indicadas adicionalmente. Más informaciones sobre la geometría de las agujas las encontrará en la leyenda a partir de la página G.I.1.

Grosor de aguja El grosor de aguja se indica fundamentalmente en NM (númerico) y SIZE (Asian / antigua denominación de Singer) así como en determinados casos según el sistema.

Sistema Lista de las designaciones de sistema que pertenecen al Canu y a la ilustración de la aguja.

G.V Grupo de precios

Partiendo del grupo de precios **GP**, puede tomar los precios de la lista de precios válida.

Observación de SCHMETZ:

Si usted cambia las letras detrás del Canu, entonces sólo se modificará la forma de la punta. ¡La geometría de la aguja continúa siendo la misma!

Para ello, compare nuestro ejemplo:

Canu	Sistema
20:05 **EB** 1 =	134 **SES** (punta de bola fina)
20:05 **FB** 1 =	134 **SUK** (punta de bola mediana)

Para ello, compare la tabla de puntas de agujas en G.I.

Tan pronto como se disponga de una modificación del diseño/geometría, se cambiará el Canu.

Ejemplo: Canu 20:05 1 134 (R)
19:25 1 134 K - punta corta
18:60 1 134 KK - talón corto

The illustrations of the needles in G.IV are drawn **1:1**. All measurements in [mm].
Las ilustraciones de agujas en G.IV están en la escala **1:1.** Todas las medidas en [mm].
Les illustrations d'aiguilles en G.IV sont à l'échelle **1:1**. Toutes les dimensions sont indiquées en [mm].
Die Abbildungen der Nadeln aus G.IV sind im Maßstab **1:1**. Alle Abmessungen in [mm].

SCHMETZ always uses the metric size designation **NM (1/100 [mm])**.
NM specifies the diameter in the cylindrical region of the needle blade, above the scarf and below the reinforced blade.

Available needle sizes are always specified in the Canu-overview in NM and SIZE (cf. G.IV).
Compare the example on this page: 100 = NM
16 = SIZE (Asian/old SINGER designation)

In certain cases, system-specific size designations are also used.
Example: Schiffli needles NM 100 = SIZE 2
System 459 R NM 100 = SIZE 11
Union Special NM 100 = SIZE 040

Further size designations can be found in the table beside.

SCHMETZ emplea básicamente la denominación métrica de grosor **NM (1/100 [mm])**.
La denominación NM indica el diámetro en el sector cilíndrico del tronco de la aguja por encima de su rebaje y por debajo del tronco reforzado.

Los grosores de aguja disponibles se indican siempre en la vista general del Canu (véase G.IV) en NM y en SIZE. Compare para ello el ejemplo de agujas de esta página:
100 = NM
16 = SIZE (Asian/antigua denominación de SINGER para el grosor)

Adicionalmente a ello, en casos especiales se relacionan denominaciones de grosores específicados conforme al sistema.
Ejemplo: Agujas Schiffli NM 100 = SIZE 2
Sistema 459 R NM 100 = SIZE 11
Union Special NM 100 = SIZE 040

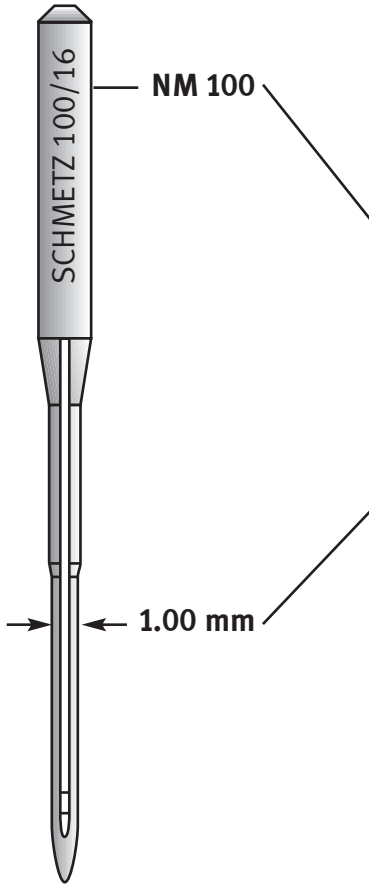
Para más denominaciones de grosores, vea la tabla de la página al lado.

SCHMETZ utilise principalement la désignation métrique de grosseur **NM (1/100 [mm])**.
Le chiffre NM indique le diamètre dans la zone cylindrique de la tige d'aiguille au-dessus de l'encoche et en-dessous du renforcement de la tige.

Les grosseurs d'aiguille disponibles sont toujours indiquées en NM et en SIZE dans la liste Canu (voir G.IV).
Voir l'exemple de comparaison sur cette page: 100 = NM
16 = SIZE (Asian/ancienne désignation de grosseur SINGER)

En outre, des désignations de grosseurs spécifiques sont indiquées dans des cas particuliers.
Exemple: Aiguilles Schiffli NM 100 = SIZE 2
Système 459 R NM 100 = SIZE 11
Union Special NM 100 = SIZE 040

Vous trouverez d'autres désignations de grosseur dans le tableau de la page à côté.



SCHMETZ verwendet grundsätzlich die metrische Dickenbezeichnung **NM (1/100 [mm])**.
Die NM gibt den Durchmesser im zylindrischen Bereich des Nadelschaftes oberhalb der Hohlkehle und unterhalb der Schaftverdickung an.

Die verfügbaren Nadeldicken werden in der Canu-Übersicht (vgl. G.IV) immer in NM und in SIZE angegeben.
Vergleichen Sie dazu das Nadelbeispiel auf dieser Seite: 100 = NM
16 = SIZE (Asian/alte SINGER-Dickenbezeichnung)

Zusätzlich werden in besonderen Fällen systemspezifische Dickenbezeichnungen aufgeführt.
Beispiel: Schiffli-Nadeln NM 100 = SIZE 2
System 459 R NM 100 = SIZE 11
Union Special NM 100 = SIZE 040

Weitere Dickenbezeichnungen finden Sie in der nebenstehenden Tabelle.
